New Features in this Release

Advanced Search

Advanced search allows users to specify additional criteria when using the main search box on the home page or from the header. With advanced search, a user can choose what they want to search for ("All", Parts books, Documents, Pages, or Parts) and they can choose between an "exact match" or a "contains" search.

Whatever selection the user makes will be retained for future searches until the user changes it again. In this way, a user can set the system up to search on their most media type and most used search type at any time, or for any individual search.

Documoto 2017.5 Cloud Library Release Notes

Clicking a book result goes straight to the page

When clicking a book search result, you will now land on the most relevant page for your search instead of seeing the book viewer with chapters. This means users will get to the exploded diagram and BOM with fewer clicks.

Deep Linking via DirectURL

With Documoto Rocket, you can deep link any user to any page, book, or part in the system by simply copying and pasting the link the URL bar and sending it to the user.

However, for users who have used our DirectURL documentation in the past to dynamically build deep links - we now support the exact same link structure for building your DirectURL's and landing a user on the page they have built. This is especially useful if you have built an application within a portal that allows the user to select information about the page or part they are looking for, prior to them opening Documoto.

Updated Features in this Release

Feature	Description	Ideas Ref
Hotpoint Sizes	Hotpoints now size appropriately based on how far you zoomed in while looking at an exploded	CLOUD-I-9
Page Details Tab	The Page Details tab on the Page Viewer can now be renamed in Tenant Admin > Labels. Giving you the flexibility to change the name to "Comments" or any other label you prefer.	N/A
Updated search box default text	This text had said "Search Part, Serial, or Model Number". It now says "Search for anything" in an attempt to alleviate confusion around what can be input into that search bar.	CLOUD-I-219
Transparent Hotpoints	Using the styles editor, you can now set a transparent value for your hotpoints, allowing you to hotpoint your diagrams while still keeping the original callout visible.	N/A

Documoto 2017.5 Cloud Library Release Notes

Part Reindexing Improvements	When access controls for media were changed, parts were not being re-indexed. Parts will now be reindexed when access controls are updated, meaning the correct parts will display.	N/A
Improved search within a book UI	Made it easier to remove or edit your search term when using the search within a book field	N/A
Document Descriptions	Document descriptions now display in search results, just like they do for Interactive Parts Books.	N/A

Bug Fixes in this Release

Feature	Description	Ideas Ref
Fix border of filter boxes	On wider screens the filter boxes on the left side had been displaying a border within the filter field. This border is now gone	N/A
