

Release Date

The Documoto 2016.4 Release will be available in April 2016.

What's New

This release delivers ongoing improvements to our core Documoto platform as well as improvements to order management.

Highlights

- ✓ **Defects and Enhancements.** We've heard your feedback! In this release, we made it a focus to tackle more of the items you've asked us to fix. Take a look at the list, and get in touch with your account manager for details if these fixes impact you.
- ✓ **Order Management improvements.** For customers who are using Order Management, we made a couple of key improvements based on your feedback. In particular, we no longer require a price column to be set on your parts list.

Defect Fixes and Enhancements
